

Unlock the full potential of your Dell Wyse Thin Clients

Maximize your hardware's power with NoTouch OS

61%

of NoTouch OS customers have hardware lifecycle that is 5+ years.

of NoTouch customers save at least \$500-\$2,000 per device per year.

53%

14+
hours per week

IT departments save hours a week with NoTouch OS.

Stratodesk NoTouch: The Ultimate Partner for Dell Wyse Endpoints

Eliminate the need for costly hardware investments

Prolong the lifespan of your current Dell Wyse thin clients, allowing you to save significant costs on the burdensome hardware upgrade.

Stay connected and thrive in every environment

Support for partner integrations, keeping you updated on the latest connection protocols and partner apps including Citrix Workspace, Microsoft AVD Client, VMware Horizon Client, and more.

Unlock the power of seamless communication

Crafted for seamless connectivity across the enterprise, our solution is made for remote and hybrid work environments, offering optimized unified communication capabilities with top-notch features for platforms like Zoom and Teams.

Unleash the limitless power of superior management and control

NoTouch Center, whether on-premises or in the cloud, empowers you to efficiently deploy, manage, and update all your devices running on NoTouch OS in your environment.

Stratodesk is the perfect Thin Client Operating System (OS) to upgrade your existing Dell Wyse Thin Client deployment.

Stratodesk software runs on various Dell Wyse TC models to ensure a secure and streamlined endpoint deployment. Additionally, the license for NoTouch OS is portable and easily transferable.

Boost Security

Save on Hardware Costs

Powerful Management Center

Highly Scalable

“ THE EASIEST WAY TOWARDS FLEXIBLE THIN CLIENTS ON YOUR EXISTING HARDWARE ”

We have been using it for over a decade now, it's been a very reliable and easy to administer product for us. We use it with our Citrix system to deliver VDI and it's been a great resource.
